

A scatter plot showing the relationship between Height (cm) on the x-axis and Weight (kg) on the y-axis. The x-axis ranges from 70 to 250 cm, and the y-axis ranges from 0 to 150 kg. The data points are black dots. There is a dense cluster of points between 150-200 cm and 50-100 kg. A few outliers are visible at higher heights and weights, such as one point near (175, 140) and another near (235, 100).
